

🎯 A2 - Assignment Two

You have to choose **any three design** from the given designs and create it using **CSS Flexbox** and **Position** properties.

Requirements

- Use:
 - `display: flex`
 - `position: relative`
 - `position: absolute`
 - Proper spacing/alignment techniques

Instructions

Try to make the design as close as possible to the original.

For Images / Assets:

You can use:

- Google Lens
- Google Search
- Freepik
- Pinterest
- Unsplash
- PNG websites
- Or research using ChatGPT

Important

Before directly connecting with mentors:

Follow this process first:

1. Try solving the issue yourself
2. Discuss with your friends/group members
3. Research properly on GPT or Google

4. If you still can’t find the solution, then connect with mentors

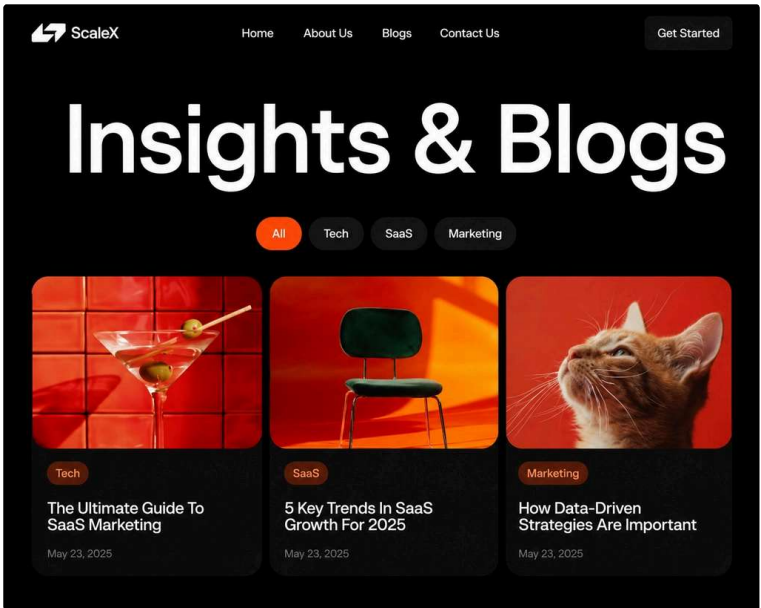

This assignment will improve your:

- Research skills
- Problem-solving ability
- UI understanding
- CSS Flexbox concepts
- CSS Position concepts
- Real-world frontend structuring

Designs: -

Choose any three design from the provided references.

1. Easy

2. Medium

3. Hard
