

A1 - Assignment One Day 4 CSS Task

You have to choose **any one design** from the 3 designs shared below and create it using position properties like:

- `position: relative`
- `position: absolute`

This task is mainly focused on helping you understand how positioning works in real UI layouts.

Instructions:

- Try to make the design as close as possible to the original.
- For images/assets:
 - Use Google Lens
 - Search on Google
 - Research with ChatGPT if needed
- You can also take help from GPT/Google for understanding coding concepts.
- Also, explore [Remix Icon](#) for the icons used in the designs. If you are unable to add the icons right now, then you can skip the icons part for now. Later, when we introduce Remix Icons in class, you can come back and add them to this assignment.

Important:

Before directly connecting with mentors:

1. First try solving the issue yourself.
2. Discuss with your friends/group members.
3. Research properly on GPT or Google.
4. If you still can't find the solution, then connect with mentors for help.

This process will improve your:

- Research skills
- Problem-solving ability
- UI understanding
- CSS positioning concepts

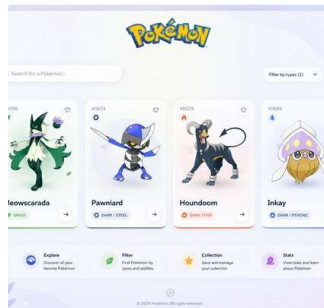

Best of luck

Designs: -

1. Easy

2. Medium

3. Hard
