

JavaScript Practice Task – Beginner Friendly

Instructions

- Create a single file named `practice.js`.
 - Solve all questions in the same file.
 - Add comments before every question.
 - Run your code and verify the output.
-

Part 1: Variables, Functions & Conditions

Q1. Create a function that returns the sum of two numbers.

```
add(10, 20); // Output: 30
```

Q2. Create a function that returns the square of a number.

```
square(5); // Output: 25
```

Q3. Create a function that checks whether a number is Even or Odd.

```
checkEvenOdd(7); // Output: Odd
```

Q4. Create a function that returns the larger number among two numbers.

```
max(10, 20); // Output: 20
```

Q5. Create a function that checks if a person is eligible to vote.

```
isEligible(18); // Output: Eligible
```

Part 2: Loops

Q6. Print numbers from 1 to 50 using a loop.

Q7. Print all even numbers between 1 and 100.

Q8. Find the sum of numbers from 1 to 100.

Output:

```
5050
```

Q9. Print the multiplication table of a number.

Example:

```
table(5);
```

Output:

```
5 x 1 = 5 5 x 2 = 10 ... 5 x 10 = 50
```

Q10. Count how many digits are present in a number.

Example:

```
countDigits(12345); // Output: 5
```

Part 3: Strings

Q11. Reverse a string.

```
reverseString("hello"); // Output: olleh
```

Q12. Count vowels in a string.

```
countVowels("javascript"); // Output: 3
```

Q13. Check whether a string is a palindrome.

```
isPalindrome("madam"); // Output: true
```

Q14. Convert the first letter of every word to uppercase.

```
capitalize("hello world"); // Output: Hello World
```

Q15. Count how many times a character appears in a string.

```
countChar("javascript", "a"); // Output: 2
```

Part 4: Arrays

Q16. Find the largest number in an array.

```
[10, 20, 30, 40, 50] // Output: 50
```

Q17. Find the smallest number in an array.

```
[10, 20, 30, 40, 50] // Output: 10
```

Q18. Find the sum of all array elements.

```
[1,2,3,4,5] // Output: 15
```

Q19. Return only even numbers from an array.

```
[1,2,3,4,5,6] // Output: [2,4,6]
```

Q20. Remove duplicate values from an array.

```
[1,2,2,3,4,4,5] // Output: [1,2,3,4,5]
```

Bonus Task (For Fast Learners)

Build a Student Marks Calculator.

Input:

```
[50, 60, 70, 80, 90]
```

Output:

```
Highest Marks: 90 Lowest Marks: 50 Average Marks: 70 Total Marks: 350
```
